### **OTHER**

San Francisco Bay Area, CA

*Section 185A and incomplete data areas are not included. Dates in parenthesis are when the ozone standard must be met. On July 10, 1998 (63 FR 37258), EPA published the final rule redesignating the San Francisco Bay Area to nonattainment with the federal 1-hour ozone NAAQS. The redesignation was authorized under the general nonattainment provisions of subpart 1 of the Act. The Bay Area, therefore, does not have a subpart 2 classification. When comparing air quality in the Bay Area to the traditional subpart 2 classification system, the Bay Area's design value is equivalent to that of a moderate area. This is NOT an official list of ozone nonattainment areas. See the Code of Federal Regulations (40 CFR Part 81) and pertinent Federal Register notices for legal lists and boundaries.*
