

Aligned with EPA's focus on environmental protection, energy independence, technological advancement, and economic growth.

The voice of clean mobility technology suppliers

MECA, an international, non-profit association based in Washington, D.C, has been the voice of the emission control and clean mobility industry for 50 years.

MECA has provided technical information to governments and industry on tailpipe exhaust controls and vehicle efficiency technologies, positioning the U.S. as the international leader in technologies that reduce the impacts of transportation on air quality.

MECA members offer the most advanced emission control solutions for engines as well as advanced powertrain solutions for ICE, hybrids, hydrogen, and electric on-road and off-road vehicles and equipment.

MECA members commercialize components for all mobile source categories ranging from small handheld to large equipment powering locomotive and marine applications.

U.S. clean mobility sector
annual revenues total

\$100B+

Clean mobility suppliers
support over

300,000

*jobs across manufacturing,
engineering, and supply
chain logistics*

**Our technology-neutral
approach has supported
EPA's mission and grown
the industry to meet
environmental needs.**

MECA members' diverse technologies

**ADVANCED
ENGINE SYSTEMS**

**48V MILD & FULL
HYBRID SYSTEMS**

**PLUG-IN HYBRID
TECHNOLOGIES**

**BATTERY & FUEL CELL
ELECTRIC COMPONENTS**

**MECA stands ready to support
EPA with our analysis, technical
expertise, modeling, and more.**
